

April 10, 2018

### **A Message from the President**

ProForum is right around the corner! We're excited again this year to bring together our corporate partners to help us fine-tune our strategy and improve our overall execution. 2018 is a year of increased focus on the needs of our corporate partners. On April 18th at Honda of South Carolina's plant in Timmonsville, South Carolina, the Council will meet with corporate members to discuss the Economic Impact of our work, alignment of 'Needs & Values,' and how we enhance delivery through our updated RING structure. As we progress this year and continue to face an interesting and uncertain social environment, it remains our goal to impact businesses in a deliberate and sustainable manner. We warmly invite all corporate partners to join us for ProForum 2018!
